LASER PAIN THERAPY

DRUG-FREE PAIN RELIEF AND HEALING

Low Level Laser Therapy or Cold Laser Therapy is a scientifically proven & evidence-based medical treatment. It offers a safe, non-invasive & painless solution to both acute injuries & chronic pain.

Affordable, highly effective treatment with no known side-effects.

Supported by over 30 years of extensive use internationally in Europe, UK, North & South America. A treatment modality backed by Harvard University & NASA research.

Users include British & US military, premier division soccer teams, Olympic teams, Formula 1, rugby & cricket team therapists as well as specialist pain clinics in the UK & USA.
